Delegation from Russia & U.S. Commerce Department Visit Viscon Facility

December 5, 2012 Bakersfield, CA. – A Russian Delegation from Khanty-Mansiisk High Technology Park Yugra and the U.S. Commerce Department have entered into discussions with Viscon California LLC. The High Technology Park’s mission is to create an environment for advancement of innovation technologies for the development of the Khanty-Mansiysk Autonomous Okrug - Yugra. Of which, the Viscon product has been identified as a focal point to achieve such goals. Several key elements have been discussed regarding the High Technology Park, to include a Viscon manufacturing plant in Russia. To achieve the aims, the High Technology Park carries out the following activities:

To advise and support the governmental authorities of the Khanty-Mansiysk Autonomous Okrug - Yugra in policy and decision making.

To promote innovation development of small and medium enterprises.

Set up and develop small and medium enterprises that bring innovation into oil and gas industry.

Provide expertise, test and implement innovation technology and state-of-the-art equipment.

Provide support for upgrading training and retraining for professionals in the sphere of innovation activity.

Render the governmental authorities of the Khanty-Mansiysk Autonomous Okrug - Yugra services to support decision making and contribute to the transition to innovative economy in the Khanty-Mansiysk Autonomous Okrug – Yugra.
